

Verify's Supply Chain Delivery Assurance™ services assure Customers receive product on time from their suppliers. Utilizing a proven team, best-practice processes, and a flexible online system, Verify performs integrated, managed, and tailored services to improve a multi-tiered global supply chain.

## BENEFITS

- ◆ Recover, improve and sustain supply chain on-time delivery (OTD)
- ◆ Provide real-time visibility of true supplier capability, capacity and status information
- ◆ Avoid costs caused by inaccurate part status and late deliveries

## SERVICE DELIVERY

Verify offers three types of Supply Chain Delivery Assurance™ services, each with appropriate deliverables and metrics. These turnkey systematic services work in sequence to improve supplier OTD, thereby reducing the level of on-site support.

### CRITICAL RECOVERY

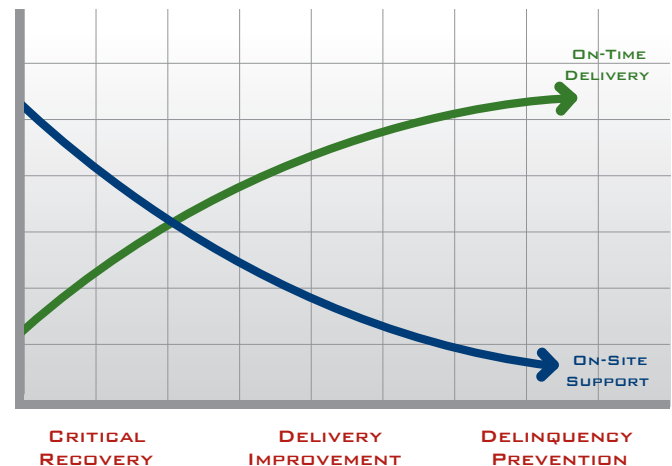

Restores and/or assures the supply of product that is critical per the Customer's master production schedule. Typically lasts a few weeks before the supplier is transitioned to Delivery Improvement services.

### DELIVERY IMPROVEMENT

Applied to the fractional portion of the Customer's supply chain that is causing most of the shortage problems. When appropriate on-time delivery performance is achieved, suppliers are transitioned to a Delinquency Prevention service.

### DELINQUENCY PREVENTION

Applied to the Customer's well-performing suppliers as a proactive prevention against late deliveries. Assures supplier delivery commitments support customer need date requirements.

## TYPICAL TASKING

A broad range of engineering and management techniques are utilized to perform these services.

Supply Chain Delivery Assurance Techniques		
PROGRAM MANAGEMENT	SUBCONTRACT MANAGEMENT / SUBTIER CONTROL	CAPABILITY ASSESSMENT
PLANNING / SCHEDULING INTEGRITY	ROOT CAUSE ANALYSIS	CAPACITY ASSESSMENT
STATUSING	STATUSING AND EXPEDITING	RISK ASSESSMENT
